

Aluno: Zaqueu
Curso: Análise e Desenvolvimento de Sistemas

ATIVIDADE 01

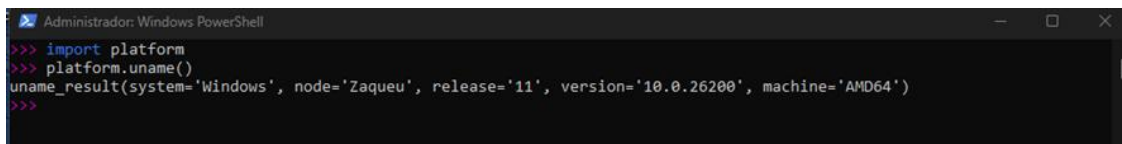

Atenção: Antes de realizar a atividade, leia as orientações no AVA.

1. Versão do Python

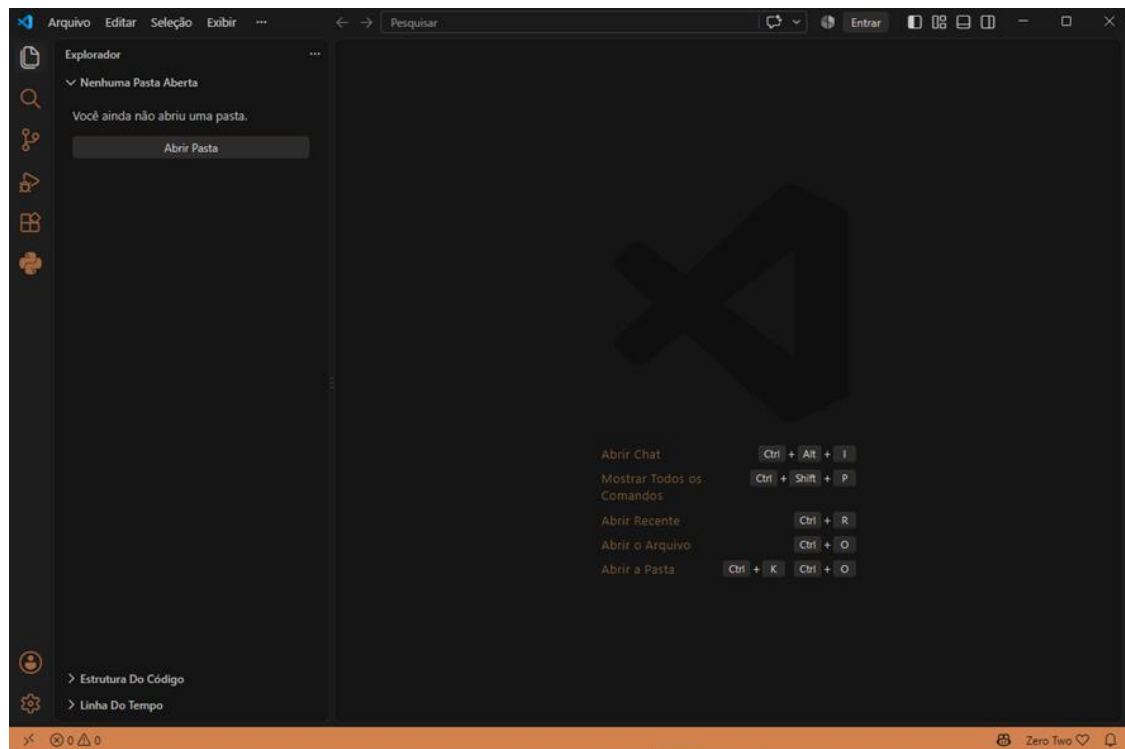

```
Administrador: Windows PowerShell
PS C:\WINDOWS\system32> python3 --version
Python 3.14.7
PS C:\WINDOWS\system32>
```

2. Dados do sistema (platform.uname())

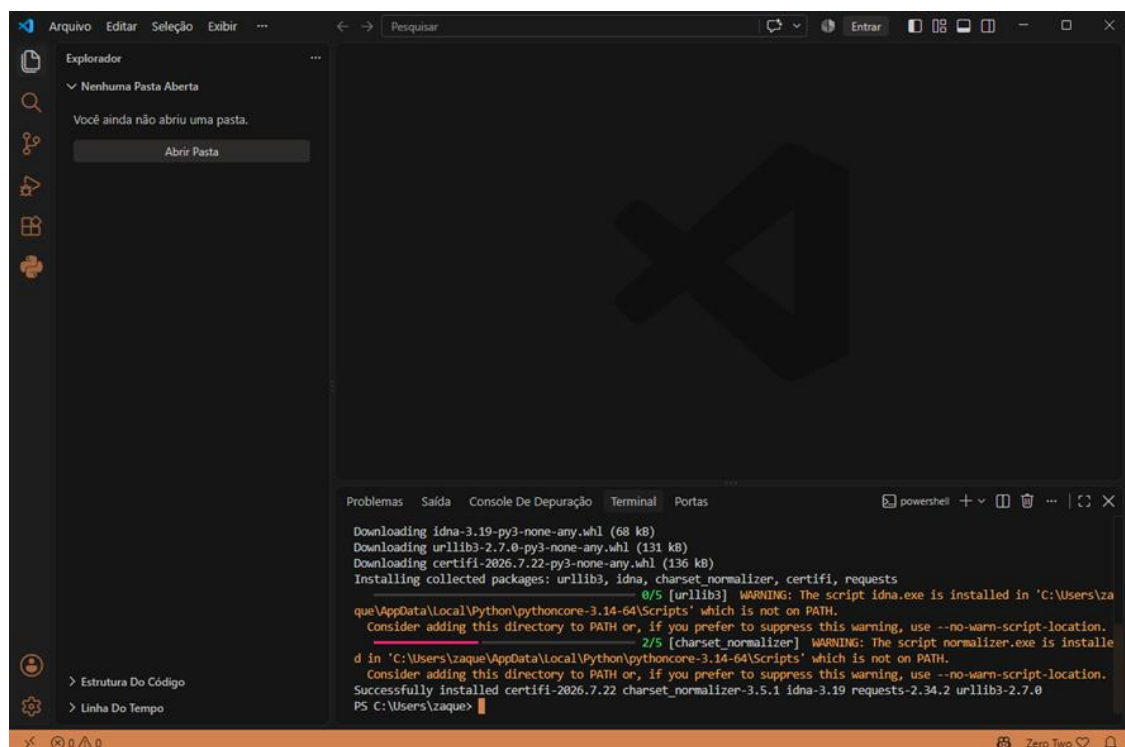

```
Administrador: Windows PowerShell
>>> import platform
>>> platform.uname()
uname_result(system='Windows', node='Zaqueu', release='11', version='10.0.26200', machine='AMD64')
>>>
```

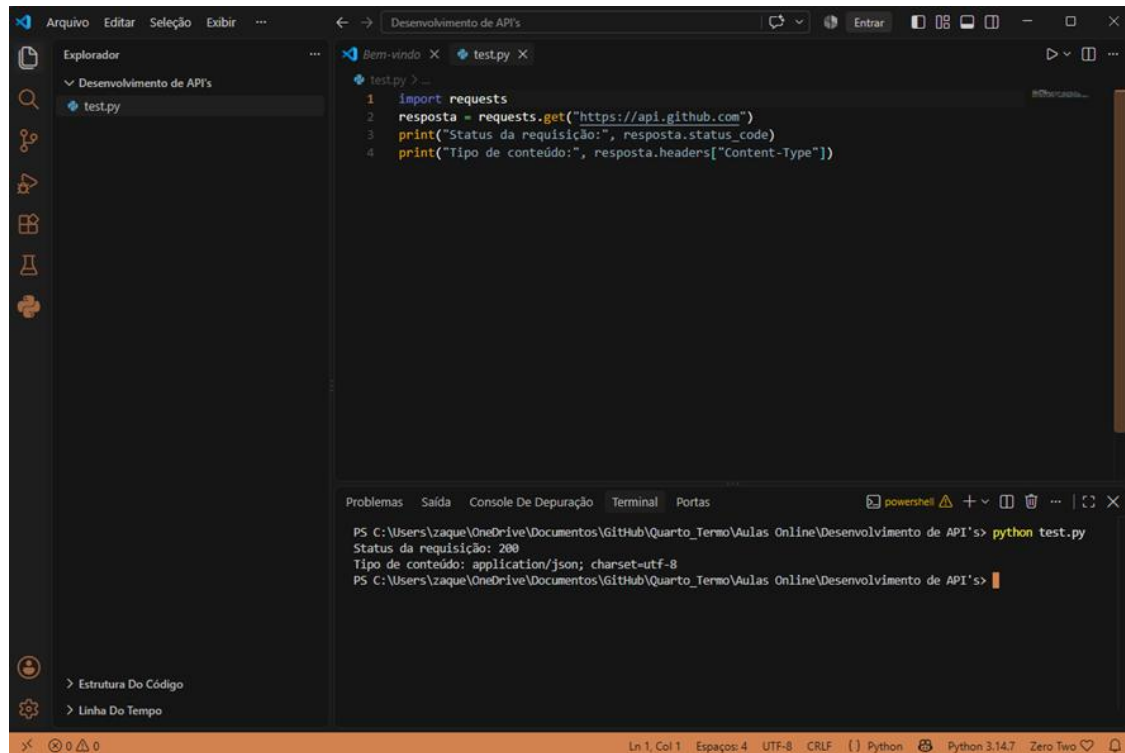

3. IDE utilizada (VSCode)

4. Instalação da biblioteca via PIP

5. Execução do código com a biblioteca

The screenshot shows the Visual Studio Code interface. The Explorer pane on the left shows a project named 'Desenvolvimento de API's' with a file 'test.py'. The main editor area displays the following Python code in 'test.py':

```
1 import requests
2 resposta = requests.get("https://api.github.com")
3 print("Status da requisição:", resposta.status_code)
4 print("Tipo de conteúdo:", resposta.headers["Content-Type"])
```

Below the code editor is a terminal window with the following output:

```
PS C:\Users\zaque\OneDrive\Documentos\Github\Quarto_Termo\Vaulas Online\Desenvolvimento de API's> python test.py
Status da requisição: 200
Tipo de conteúdo: application/json; charset=utf-8
PS C:\Users\zaque\OneDrive\Documentos\Github\Quarto_Termo\Vaulas Online\Desenvolvimento de API's>
```

The status bar at the bottom indicates the file is 'Ln 1, Col 1', uses 'Espaços: 4', 'UTF-8' encoding, 'CRLF' line endings, and is a Python file using 'Python 3.14.7'.
